TEACHING EFFECTIVENESS

EDUCATION TRAINING GRANTS:

2014-2017
2010-2013 **Ethicon Education Grant** (A Johnson and Johnson Company) ETHICON has agreed provide the ETHICON manufactured product (suture etc.) you requested in the educational grant to support the grant titled San Diego State University School of Nursing Graduate Nurse-Midwifery Education Program. 4,072.00. **AWARDED**

- 2010-2012** **California Department of Health Services, Maternal Child Health Branch**
2007-2010 Three Year Advance Practice Nurse Training Grant to help fund the SDSU-SON Nurse-Midwifery Education Program. \$225,000 **awarded: 2007-2010: and 75,000 per year for 2011 and 2012** Requires Annual Report **Lauren Hunter, PhD, CNM, Principal Investigator and Project Director**
- 2004-2007 **California Department of Health Services, Maternal Child Health Branch**
 Three Year Advance Practice Nurse Training Grant to help fund the SDSU Nurse-Midwifery Education Program. \$225,000 awarded: Requires Annual Report **Lauren Hunter, PhD, CNM, Principal Investigator and Project Director. AWARDED**
- 2001-2004 **California Department of Health Services, Maternal Child Health Branch**
 Three Year Advance Practice Nurse Training grant to help fund the UCSD Nurse-Midwifery Education Program. \$225,000 awarded. Sheila Pickwell, Ph.D., CFNP, Principal Investigator. **Lauren Hunter, MS, CNM, Project Director. AWARDED.**
- 1998-2001 **California Department of Health Services, Maternal Child Health Branch**
 Three Year Advance Practice Nurse Training grant to help fund the UCSD Nurse-Midwifery Education Program. \$243,000 awarded. Sheila Pickwell, Ph.D., CFNP, Principal Investigator. **Lauren Hunter, MS, CNM, Project Director. AWARDED.**

ACCREDITATIONS/APPROVAL

- Spring 2013 **Accreditation of the SDSU-SON Nurse-Midwifery Graduate Education Program:** Accreditation Commission for Midwifery Education (ACME) .Responsible for writing the SER and coordinating site visit. Accredited 2013. **Dr. Hunter**, Accredited through **2023**: Requires annual progress
- Spring 2009 **School of Nursing California Board of Registered Nursing (BRN)**
Accreditation: Responsible for writing SDSU-SON Graduate Nurse-Midwife Self Evaluation Report (SER) Due Fall of 2008. Accreditation Visit Spring 2009, Accredited for eight years without any deficiencies or needed remediation
- Summer 2008 **National Certification Corporation (NCC) Approval for the Women’s Health Nurse Practitioner Program (WHNP):** Responsible for writing Self Evaluation Program Report: Received Summer 2008/ Approval is ongoing pending continued use of required criteria.

- 2007 **Accreditation of the SDSU School of Nursing by the Commission on Collegiate Nursing Education (CCNE):** Responsible for writing Nurse-Midwife/WHNP section of self evaluation report and visit: Accredited for eight years
- 2004 **Accreditation of the SDSU-SON Nurse-Midwifery Graduate Education Program:** American College of Nurse- Midwives, Division of Accreditation. Responsible for writing the SER and coordinating site visit.
Dr. Hunter, Accredited through **2012**: Requires annual progress report
- 2007 & 2004 **UCSD College of Medicine & Medical Center Associated Health Professions Education Committee (AHPEC) San Diego State University MSN Program** Report Dr. Wahl /**Dr. Hunter** Through 2009
Report Dr Todero/**Dr Hunter**
- 1997 **SDSU/UCSD now the SDSU Nurse-Midwifery Education and California OB/GYN Nurse Practitioner Program California State Board of Registered Nursing Accreditation**
Accredited through 2008
- 1997 **SDSU/UCSD Nurse-Midwifery Program American College of Nurse-Midwives Evaluation Report**
Accredited through 2002 with extension to December 2003
Annual Progress Report 1998-2003

CURRICULUM DEVELOPMENT AND TEACHING INNOVATIONS:

- Fall 2006-
Spring 2009** **Development, Approval and Accreditation of New Women’s Health Nurse-Practitioner Program (WHNP), and new combination of Nurse-Midwifery/WHNP Program.**
Development required the following preparation. Starting Fall of 2008 Courses Nurs 634, 635, 640, 641, 742 and 743 were replaced by new specialization course numbers Nurs 636, 637, 638, 639, 744 and 745
Development of new course description and course outcomes 2006-2007
School of Nursing Graduate Program Committee and faculty approval of new course descriptions and objectives 2006-2007
New catalog descriptions-2006
Development of new clinical sites and contracts-2008-2009
Program Accreditation from CCNE Fall 2006
CCNE approval of substantive program changes 2007
NCC Approval Summer 2008
BRN Accreditation Spring 2009

- Fall 2006 **Development of UCSD Medical Center Maternal –Newborn Units as a new site for clinical education of N354 (Care of the Childbearing Family) students.** This site is unique because it gives students the opportunity to see natural low risk births in a birth center with the midwifery model of care and the use of a doula (a special woman that supports the laboring woman and her family). Additional opportunities include interdisciplinary teaching and rounds with medical students and residents, and opportunities to practice in the NICU and hi-risk antepartum units. Included development of a new N354 Clinical Guidelines Syllabus specifically for students at UCSD.
- Fall 2005- **Instituted the routine practice of use of appropriate adjunct faculty from the SON for thesis second or third chairs** (Fall 2005) in order to engage the nursing community with the SON.
- 2005-present **Implemented the use of “Noelle”** A childbirth simulator for “hands on” education of normal vaginal and breech birth, shoulder dystopia and post partum hemorrhage for graduate nurse-midwifery students in N640 and N742 and for undergraduate N354 nursing students to practice prenatal visits.
- 2003-2004 **UCSD Program transfer to SDSU:** As the Director of the Nurse-Midwifery Education Program was responsible for the transfer of nurse-midwife specialty courses N222, N223 and N224 previously taught at UCSD to the following SDSU Courses N635, N640, N641, N742, N743. This required the following preparation:
 School of Nursing Graduate Program Committee and faculty approval of new course descriptions and objectives
 New catalog descriptions
 Class conversion time from 4 to 3 hours
 Conversion from Quarter to Semester Hours
 Development of new brochure for program advertisement
 Development of the Nurse-Midwife Advisor Job Description for the SON
- 2003-2004 **N635: Development of new course, which combined a clinical practicum in gynecological/primary care (six hours/week) with the appropriate didactic content (fifteen hours)** Course builds upon skills and knowledge learned in N500 and N658. Required development of new clinical sites and contracts
 Development of new course description and course objectives/outcomes
- 1998-2006 **Storytelling as an Educational Teaching Strategy for Nurse-Midwifery Students:** Development of an educational strategy that used storytelling to enhance midwifery knowledge that is generated learned and internalized

through the lived experience of midwifery situations in the clinical and classroom arenas. Outcomes (positive) for a two-year period were evaluated by an open-ended questionnaire that was also developed. (SDSU/UCSD and SDSU) (See publication 2006)

- 1998-2003 **SDSU/UCSD Internship Program:** Primary faculty for development of the Internship Program that allowed students to continue in a clinical setting after graduation, while waiting for their certification exam results and state licensure. This program allowed students to continue to gain further expertise and for employers to begin the orientation process without incurring additional costs.
(SDSU/UCSD)
- 1994-2003 **SDSU/UCSD Bridge Program:** Primary faculty for the development of a program and curriculum to supplement the experiential background of prospective nurse-midwifery students. The program enabled RN's without Labor and Delivery nursing experience to complete an eighty-hour clinical practicum with volunteer nurses at UCSD in order to learn the basic skills prior to program admission. Evaluation tools demonstrated the success of this program
(SDSU/UCSD) (See publication 1997)

Instructor for: Medical, Nursing and Ancillary Services,
Cardiopulmonary Resuscitation, Accredited by the American Lung
Association; four and eight hour classes. Irwin Army Hospital, Fort
Riley, Kansas.

THESIS AND RESEARCH PROJECT PARTICIPATION:

SDSU

Thesis Chair

2008- 2009

Mary Croyle, *Maternal and Neonatal Morbidities and Co Morbidities
Associated with Induction of Labor* This descriptive study examined the
relation ship between maternal and newborn outcomes and women who

chose elective induction. This study was part of a larger funded study in cooperation with Sharp Grosmont Hospital (SDSU SON).

2005-2008

Amy Yates/Howerton, *Moral Distress in NICU Nurses and Family Centered Care* (SDSU M.S in Nursing Administration) This descriptive survey design, using a cross-sectional approach examines moral distress in Neonatal Intensive Care Nurses when they are unable to provide family-centered care to parents of ill neonates (SDSU-SON Administration).

2005-2007

Suzanne Hanson, *Efficacy of Mantram Repetition on Anxiety and Fear during Childbirth*. Pilot project and data analysis for mantra intervention taught in the prenatal period. Study will be used to seek funding for larger interventional study ((MS(c) in Community Health Nursing: Nurse-Midwifery Specialty. SDSU, School of Nursing) (See Grants & Publication).

2004-2006

Brenda Anthony, *Efficacy of Mantram Repetition on Anxiety during Childbirth*. A feasibility study for a larger interventional study that will investigate the effect of daily mantra use taught prenatally during childbirth education classes on the perception of stress and anxiety during childbirth (SDSU, School of Nursing) (See Grants & Publication).

Thesis 2nd

2004-2005

Sara Shaffer Qualitative Study: “*Lived Experience of Eating Disorders during Pregnancy*” This study was a qualitative phenomenological design and semi-structured interviews of women were used for data to learn more about eating disorders in pregnancy. (MS in Community Health Nursing: Nurse-Midwifery Specialty, SDSU SON) (See publications).

Thesis 3rd:

2013-2014

Kristen LaVon Everhart “*Communicating Childbirth Messages and Control Theory Approach*” Master of Arts in Communication Studies (PSFA School of Communication)

2011-2012

Thuy G. Nguyen “*Drinking and Smoking Habits of Pregnant Women Taking Selective Serotonin Reuptake Inhibitors and Associated Fetal Outcomes*. (Master in Public Health Program, SDSU)

- 2010-2011 Elizabeth Salas “Phenobarbital Exposure in Human Pregnancy” (Master in Public Health program in Epidemiology (SDSU))
- 2010-2011 Gretchen Bandoli “ The Association between Changing Paternity and Perinatal Outcomes when Measured in the Presence of Social and Behavioral Risk Factors” (Master in Public Health program in Epidemiology (SDSU))
- 2009-2010 Chevon Alderson “*Performance and Predictors of Hospital-based Healthcare Response to Intimate Partner Violence*” Masters in Public Health program in Epidemiology (SDSU)
- 2009- 2010 Julie Smith “*The Relationship between Congenital Anomalies and Fetal Growth Patterns among Infants Born to Diabetic Mothers.*” Will examine fetal growth pattern as a predictor for certain classes of congenital anomalies?” with a data set off 800 infants of diabetic mothers born at Sharp Mary Birch. (SDSU-MPH).
- 2007-2008 Rosie Platt “*Young Women’s Health Study: Evaluating the Determinants and Intentions for Emergency Contraception Access and use in the Post-OTC Environment*” (SDSU-GSPH).
- 2007-2008 Lori Keim “*Young Women’s Health Study: Evaluating the Determinants and Health Outcomes of Women who Seek Hormonal Contraception with or without a Pelvic Exam*” (SDSU-GSPH)
- 2007-2008 Ruth Beauchamp “*Disparities in Patriarchal Beliefs and Attitudes toward Intimate Partner Violence among Spanish Speaking Adults: Evidence from a Community Survey on Domestic Violence in San Diego County*” (SDSU, GSPH-Health Promotion) See Presentation and Publications).
- 2007-2008 Josephine Bitler “*Unraveling the Latina Paradox: Social Birthing Knowledge Among Latinas*” In depth qualitative interviews of Latina women(SDSU Department of Sociology).
- 2006-2007 Maria Alena Kish “*Coverage Rates and Predictors Associated with Receipt of Influenza Vaccine among 6-24 Month-Olds in San Diego County 2004-2005* (SDSU, School of Public Health).
- 2005-2006 Sapna Dharkar-Surber “*Evaluation of the San Diego County Baby Track Program*” This retrospective study used a comparative cohort to

examine a county wide hospital volunteer program that educated parents about immunizations for their newborns and provided reminder follow-up to determine if participation in the program improved immunization compliance. (SDSU, School of Public Health).

HONORS SENIOR THESIS:

Supervisory Chair:

Fall 2014- Spring 2015 Kaitlyn True, *Expectant First-Time Fathers Discussion Forum: Evaluation of a Model*. A mixed method descriptive/phenomenological study that evaluated the effectiveness of a first-time fathers discussion forum as a form of gender-specific prenatal education for men (SDSU, CHHS, School of Exercise and Nutrition/ Kinesiology) University Honors Program Senior Thesis. HONOR 490A and HONOR 490B

COMPREHENSIVE EXAMINATIONS:

Plan B Projects:

Fall 2003 Reader for the community health nursing/nurse-midwifery comprehensive examination question for one nurse midwife student: M.Weber.

1997 Provided exam question and was a reader for five nurse-midwifery students.

Plan B Research Proposals:

Spring 2010 Provided the research question for 3 Plan B Community Health/Nurse-Midwifery students. Released May 2009 for completion in April 2010. *There are numerous coping/comfort techniques to assist women with common discomforts during pregnancy or pain and discomfort during labor. Design either a qualitative study to explore, a correlational study to examine, or an interventional study to test an intervention concerning a coping/comfort technique.* C. Holmes. J Strauss, Amanda Bouy.

Spring 2009 Provided the research question for 3 Plan B Community Health/Nurse-Midwifery students. *There are numerous non-pharmacological and pharmacological cervical ripening/ induction management strategies.*

Design either a qualitative study to explore, a correlational study to examine, or an interventional study to test an intervention concerning this research problem. E. Phillips, S Starling, S. Lang.

- Spring 2008 Provided the research question and was a reader for 2 Community Health/Nurse-Midwifery students. *There is an increased incidence of depression in the postpartum period.* Design a study that will explore, examine, or provide an intervention concerning this clinical problem. S. Villacorta, V. Wright.
- Spring 2007 Provided the research question for Plan B Community Health/Nurse-Midwifery students (4) and was first reader for grading and oral presentation.” *There are many postulated and some known etiologies that cause preterm labor and birth. In addition, there are a variety of management therapies used in the prevention of preterm labor and birth.* Design a study that will explore, examine, or provide an intervention concerning this clinical problem.” H. Beane, R, Carlton S. Hanson, W. Sunshine
- Spring 2006 Provided the research question for Plan B Community Health/Nurse-Midwifery students (3) and was first reader for grading and oral presentation. *“How to increase the incidence of continued breastfeeding postpartum greater than one week duration”* S Corrales, K. Shields, A Montiel.
- Spring 2005 Provided the research question for Plan B Community Health/Nurse-Midwifery student (1) and was first reader for grading. *“How to decrease perennial trauma during childbirth”*: Lisa Mooney.
- Spring 2004 Provided the research questions for Plan B community health/nurse-Midwifery nurse students (3) and was first reader for grading. *“Maternal Fever during Labor and the Early Postpartum Period”* Cynthia Lindsay, Denise Gershwin.

Masters Students (CNM/WHNP or WHNP) Evidenced- based Comprehensive Change Projects:

RESEARCH GRANTS / PROPOSALS:

FUNDED:

Examination of Morbidities and Co-morbidities Associated with Labor

- 2007-2009 The purpose of this study was to explore maternal and neonatal morbidities and co-morbidities associated with induction of labor. This was a retrospective and prospective comparative descriptive design conducted at Sharp Grossmont Hospital Women's Center. The Labor & Delivery log was reviewed to identify patients, who had the admitting diagnosis of induction of labor, and those medical records were reviewed and data collected. The data was compared to those patients and their newborns that delivered during the same time period who began labor spontaneously. The sample consisted of 400 women who were admitted for induction of labor and

their newborns compared to 400 women who spontaneously begin labor and their newborns for a total of 1600 medical records. Descriptive statistics and frequencies were calculated for the medical information. Data was analyzed using SPSS for Windows version 15.0.1 (SPSS, Inc, Chicago, Ill). An analysis of variance (ANOVA) was conducted to test group differences. No direct benefits for participants exist in this study, yet as the rates of labor induction rise, it is imperative to determine the effects of this medical intervention. It is hoped that this research may benefit other patients by providing information regarding management of care for patients who are choosing to expedite their delivery. PI Ana-Maria, Co –investigators, Pisegna L., Hiner, J., Handy, C., Pyka, J., **Hunter, LP**, & Croyle, M.

2006-2008

Efficacy of Mantram Repetition during Childbirth

The purpose of this study was to examine the efficacy, outcomes, and patient satisfaction of a mind-body-spiritual intervention, mantram repetition, with respect to management and mitigation of anxiety and stress related to the childbirth experience. A convenience sample of 80 subjects attending the American Red Cross (ARC) Healthy Pregnancy Healthy Baby (HPHB) childbirth preparation class were enrolled. Demographic information and baseline scores addressing anxiety, perceived stress and coping abilities were collected prior to the introduction of the intervention. Subjects were randomly assigned to either the experimental group (n= 40) which received the mantram instruction in addition to childbirth preparation classes or the control group (n = 40), which received only childbirth preparation classes. Four to six weeks after the childbirth experience, collection of delivery statistics, anxiety, perceived stress and coping scores were conducted. Statistical comparison was accomplished. A p value of 0.05 was considered significant. PIA: Lt B. Anthony, Co-investigators: **L Hunter** and J. Bormann. (A community partner collaboration with SDSU SON, Veterans Hospital, and Navy Medical Center)

IRB approval from SDSU and NHSD 2005, Renewed September 2006-2008

2006-2008 **Influence of the Nursing Work Environment on Nursing and Patient Outcomes:**

The research aims to increase our understanding of the relationships between the nursing work environment and nursing and patient outcomes. The elements of the nursing work environment included professional practice environment and unit turbulence. Nursing outcomes include intention to leave a current position and experience of moral distress. In addition, actual turnover for participating units were calculated. A descriptive, prospective, correlational non-experimental design was used. Instruments: Professional Practice Scale, Anticipated turnover scale, Moral Distress scale, Demographic Tool. Co-PI's: C. 2004-2009 **Women's Experiences of Nurse-Midwifery Presence ("being with woman") during Childbirth**

The purpose of this study was to learn more about women's experiences of nurse-midwifery "being with woman" during childbirth. A descriptive prospective correlational replication design was used to examine the effects of the childbirth setting, significant others presence, pain relief, length of labor and number of nurse-midwifery providers on the women's experience of nurse-midwifery "being with woman" during childbirth. A 29-item seven-step response Likert scale questionnaire the Positive Presence Index (PPI) was administered to low risk postpartum women who were cared for and delivered by nurse-midwives prior to their discharge from the hospital. Data gathered from this study can be used to modify hospital settings and variables for nurse-midwifery clinical practice in order to increase the use of and amount of nurse-midwifery presence. 2004-2005 **Characteristics of Effective and Ineffective Preceptors Identified by Midwifery Students**

The purpose of this study was to learn about nurse-midwifery students' perceptions of the clinical experiences and role modeling that they receive from their clinical preceptors. The qualitative portion of the study used an open-ended website questionnaire method to gather information through content analysis about preceptor behaviors (themes) that are conducive or detrimental to student learning in the clinical setting and to identify traits (themes) of good and bad clinical preceptors from the student perspective. Quasi- statistics were generated to tabulate themes, relations and insights from the data. The descriptive portion of the study examined rankings of preceptor qualities already identified from nursing literature. Data gathered from the study can potentially increase the understanding of students' experience of being clinically precepted and help to identify traits of good and bad preceptors (PI: **Lauren P. Hunter**) (SDSU and New Jersey Medicine and Dentistry IRB, 2004)

2002-2003 **An Interpretive Exploration of the Meaning of Presence “Being with Woman” during Birth for Midwives**

This study explored the meaning of the phenomenon of the midwife’s experience of being present with a woman during childbirth. The value and importance of being with a woman during childbirth, specific and unique to midwifery care, is reflected in midwifery philosophies and models of care. This study looked through the lens of midwives who have written poetry about births they have attended to learn more about the experience of being with a woman. Hermeneutical phenomenology was selected for the philosophical methodology and method because it looked at both the phenomenon and the use of language to describe the phenomenon. The researcher reflected upon and interpreted 18 selected poems as data and developed themes, which described the midwives, lived experiences of being with a woman. Federally designated and funded association of community clinics in California. Foundation purpose: to help improve birth outcomes by increasing perinatal access and utilization in California. Funds source: The California Endowment. Project proposal: Promotoras Project. A model used to “mentor” pregnant women through a collaborative agency association between St. Vincent de Paul Medical Clinic (STVDP) and the University of California, San Diego School of Medicine Department of Reproductive Medicine and Graduate Nurse-Midwifery Education Program. Purpose: To partner expectant high-risk women (obstetrically / psychosocially) with volunteer women (promotoras) who would advocate early, regular prenatal health care, encourage well-baby exams and promote postpartum visits. Community outreach was

used. Project demonstrated a cost effective, culturally sensitive, multi-discipline health-care model designed to meet the needs of poor and indigent pregnant women in San Diego. (Project Director, Sharon Johnson, **L. Hunter**, Harvey Mandel).
Funded/Competitive: 103,000)

1993-1994 **Newton Long Fund: Promoting the Profession of Nurse-Midwifery Among High School Students**

Submitted for the American College of Nurse-Midwives Region 6, Chapter 1, to help defray expenses and encourage participation by Chapter Nurse-Midwives in a high school outreach program. Promoted professional nurse-midwifery among approximately 500 coed high school students attending any of 18 child development courses in San Diego City School District. (PI: **L.P. Hunter**, \$1,000, Competitive)

2014-present **Scientific Exploration of Neonatal Olfactory Breast Milk Study (S.C.E.N.T. Study)**

Principle Investigators: Lily Pisegna MSN, RN, Director of Women Service, Ana-Maria Gallo, PhD, CNS, RNC-OB, Director of Nursing Education, Research and Professional Development, **Lauren P. Hunter, Professor San Diego State University, PhD, CNM**, Women's Health Nursing Concentration Chair, Elly Hann, DO, Family Practitioner, Leah Rashidyan (Butts) San Diego State University, SON CNM/WHNP Graduate Student.
This quasi-experimental-control design will be conducted at in the Neonatal Intensive Care Unit (NICU) at Sharp Grossmont Hospital. Once dual approval has been obtained from the Sharp HealthCare Institutional Review Board and San Diego State University Institutional Review Board. The purpose of this study to explore premature neonates' olfactory sensitivity to breast milk.

2007-2009 **Patient Satisfaction with Retail Clinic Services**

The purpose of this study was to analyze data retrieved from completed anonymous and voluntary Patient Satisfaction Surveys from patients that utilized two Arizona

retail-based MediMin Clinics from May of 2006 through July of 2007. The survey was given in order to determine patient satisfaction with care and patient patterns and preferences. The survey considered wait times to see nurse practitioners, satisfaction with care and reasons for clinic selection. In addition, demographic data was analyzed to compare possible difference in answers to the survey based upon language preference in filling out the Patient Satisfaction Survey (English versus Spanish) and between store locations that reflect divergent socio-economic perspectives. (PI: **L Hunter**, Co –investigators Weber, C., Morreale, A., Wall, J.) (A partner collaboration with private industry MediMin Clinics, Inc.)

IRB Approval from SDSU September 2007

Data Analysis finished September 2007

2006-2009

Oral Health and Dental Care in Low Income Pregnant Women

This study considered oral health care practices and status and dental care access among low-income pregnant women in two prenatal health clinics in San Diego County. Access to dental care, current state of oral health, dietary risk factors, and personal oral hygiene practices were investigated by age and ethnicity and pregnancy outcome. Prenatal records were accessed retrospectively to verify information on the above variables. Specifically, information from the Operation Samahan Oral Health Assessment Form (Appendix 1) was utilized as data. Descriptive statistics were calculated and reported on all major variables measured in this study for the overall sample and different subgroups. Correlational analysis such as Pearson correlation coefficient, Spearman correlation coefficient and partial correlation coefficient were used to assess bivariate linear associations among the oral health practice questions and other variables. The results of this study were used to determine future needs in the community for oral health and dental care and oral health education Findings from this ethnically diverse, low income population were used to determine future research and to describe any relationships between oral health practices, poor oral health and preterm labor and or birth. (PI: **L Hunter**) Co-investigator: S Yount, (SON Fall2007). (A community partner collaboration with SDSU, SON and Samahan Community Clinics)

IRB Approval from SDSU September 2006

2005-2006 Lamaze International: Understanding Childbirth Education

The proposed research to be conducted by three interdisciplinary investigators with extensive experience in the area of childbirth and women's health, will fully explore what occurs in childbirth education classes, including informational and philosophical content, teaching strategies, and student-teacher interactions. The study design is formative and qualitative; researchers will use established focused ethnographic assessment techniques to derive a rich, culturally contextualized in-depth description of what actually happens in childbirth education classes (versus what is supposed to happen, as per curricular descriptions). Participants will include a purposive sample (i.e., a non-probability sample purposefully assembled in regard to identified variable under consideration) of teachers and their students as well as a convenience sample of pregnant women who chose not to enroll in childbirth education classes. Such findings can provide the foundation for further study of both the processes and outcomes of childbirth education. (PI: E Sobo, Co-investigators **L. Hunter**, S. Sternlieb; \$75,000, Made Final Round, 2nd place and only one proposal was funded)

2003 NIH Planning Grant RFA RR-04-002 Creating and Sustaining Interdisciplinary Teams

Medical errors in hospitals (i.e., errors in the delivery of health care) kill more people each year than car crashes, breast cancer, or AIDS. Many others survive medical errors with serious injuries or impairments. A central cause of this safety problem is the use of inefficient and ineffective clinical teams. Considerable research addresses team effectiveness and the relationship of team functioning to safety and error reduction. But the bulk of that literature concerns industries outside of health care; moreover, it is narrow in disciplinary scope, limiting the knowledge it can generate. To overcome these present shortcomings and limitations, the main objective of this planning grant is to determine, demonstrate, and disseminate a process for sustained and systematic *interdisciplinary* research into clinical team functioning as this relates to patient safety. Labor and delivery (L&D) is an excellent setting for such an endeavor because: birth is the most common reason for admission to US hospitals; many disciplines are routinely involved; and breakdowns in L&D safety are very expensive and have lifelong consequences. The specific aims of this three-year planning grant follow directly from the main objective. They are: (1) In Year 1, to identify, establish, test, and document processes and structures that support and sustain effective interdisciplinary research team building and functioning; (2) In Year 2, as an interdisciplinary research team, to define a specific clinical team and patient safety problem in L&D and develop new or hybrid interdisciplinary research approaches to that problem; and (3) In Year 3 to collaborate as an interdisciplinary research team on feasibility/pilot research and then develop full-scale research proposals regarding the agreed-upon problem. The interdisciplinary research approach that is designed, and the resulting R-01 proposals developed, will yield new insights into clinical team functioning and patient safety that could never be achieved by the present practice of isolated disciplinary or multi-disciplinary inquiry. The knowledge

generated and disseminated through this project will include a model for effective, sustainable interdisciplinary research team function (to be described in a guidebook and training manual) that others may replicate. (1.2 million, submitted February 2004 P. I. Gwen Anderson RN, PhD, Co-P. I.'s **Lauren P. Hunter, RN, CNM, PhD**, Paul Kurtin, MD, Elisa Sobo, PhD,). September 2004: 150 applications /15 funded. Scored 250 and needed 200 to score). (Multi-disciplinary team among community partners, Children's and UCSD Hospitals, and CHHS Faculty)

Minority Recruitment Advisory Committee Member (SDSU/UCSD

School of Nursing)

UNIVERSITY OF CALIFORNIA, SAN DIEGO:

May 2001

“Networking with the Pro’s.” UCSD Career Services Center.
Volunteer Professor to assist students in career decisions.

April 2001

UCSD Career Exploration Week Program - Volunteer professor to have students “shadow” during clinical

June 1995 - 1996

University of California, San Diego: OB Management Clinic Review Committee Member.

November 1994 -
March 1995

University of California, San Diego Medical Center.
Subcommittee Chair on Maternal/Newborn Early Discharge for

Perinatal Practice Committee.

1993 - 2003

Perinatal Practice Committee Member UCSD

SAN DIEGO COUNTY/REGIONAL:

Jan 2002-Dec 2005

Regional Perinatal System Advisory Board Member
The Regional Perinatal Board is made up of community leaders from hospitals, health agencies and systems, educational institutions and professional societies. The mission of the board is to improve health outcomes of the region's infants and women of childbearing ages, through facilitation of and access to integrated, high quality health services. San Diego and Imperial County

1988

“Struggle to be Born” Conference: Regional Perinatal System;
Conference Committee Member

1989 - 1990

March of Dimes - Public Affairs Committee Member; San Diego, California.

STATE OF CALIFORNIA:

Spring 2012-present

Health Professions Education Program Advisory Committee for the State of California Health Professions Education Foundation: Review scholarship and loan repayment applications and recommend prospective recipients to the Board of trustees and Office of Statewide Health Planning and Development.

January 1995-2003

Nurse-Midwifery Advisory Committee Member for State of California Board of Registered Nursing. Representative for Nurse-Midwifery Education. Three-Year Terms.

July 1996

Board of Registered Nurse-Midwifery Content Expert for review of proposed equivalency examination. California

PROFESSIONAL ORGAIZATION/COMMUNITY SERVICE:

CALIFORNIA NURSE-MIDWIVES ASSOCIATION (CNMA):

- 2002, 2008- 2013 CNMA Lobby Day Mentor & Participant with SDSU Student Sacramento, CA
- 1993 - 1995 California Nurse-Midwife Association (CNMA) Legislative Committee Member.
- 1993 - April 1994 California Nurse-Midwives Association, Member of the Board of Directors.
- 1992 - 1993 California Certified Nurse-Midwives State Organization Steering Committee Member.

AMERICAN COLLEGE OF NURSE-MIDWIVES (ACNM):

- 2006 Inducted as a **Fellow** in the American College of Nurse-Midwives (See above)
- 2006-2008 Nomination Committee Member for the American College of Nurse-Midwives (by ballot election Dec 2005)
- Spring 2006 Lead Committee Member (3) for development of a survey tool, collection of data, and analysis of educational program survey requested by the ACNM ad DOME to learn more about reasons that midwifery programs survive or close. (See presentations)
- 2006 Committee Task Member for development of a “white paper” on Doctorate in Nursing Practice Education and the College of Nurse-Midwives. **Published in peer-refereed journal *JMWH* (2006).**
- 2002-2005 American College of Nurse-Midwives (ACNM) Division of Education (DOE) Governing Board: Policy Section Chair
Appointed by the DOE Chair upon recommendation by the Governing Board and Section Members: Meets three times per year. Three year term
PURPOSE: Advise the ACNM Board of Directors and national office professional services staff on matters pertaining to educational policy
RESPONSIBILITIES:
 - a) Advise federal and state policy analysts (national office) as needed
 - b) Maintain liaison to policy Chairs in other divisions, committees and external organizations
 - c) Advise national office staff on collection of data needed to guide educational policy

- d) Identify and address barriers to midwifery education
- e) Represent the ACNM and collaborate with external agencies and organizations as requested by the DOE Chair

January 1999 -2001	ACNM Speakers Referral Bureau (Member). The bureau provides the names of qualified CNM's to organizations and companies seeking to include the midwifery perspective in various activities such as national conferences and panel discussions.
October 1996-2000	Contributing Editor, Education Exchange Column, Journal of Nurse-Midwifery
February 1996 -2000 Midwifery.	Contributor Editor for Education Exchange Column, Journal of Nurse-Midwifery.
April 1993 - Oct 1996	Assistant Editor, Journal of Nurse-Midwifery Region 6
Jan 1992 - April 1994	American College of Nurse-Midwives: Peer Elected Chairperson for Region 6, Chapter 1 (Two terms)
. October 1989	Chairperson for American College of Nurse-Midwives Chapter 6, Region 1, Public Relations Committee. Annual ACNM Convention 1989. San Diego, California.
1989 - 1991	American College of Nurse-Midwives, Chapter 6, Region 1, Public Relations Committee Chairperson, San Diego, California.
1989	Chair: San Diego ACNM Nurse-Midwifery Week
